

Revolution in evolution? Or evolution in revolution? ...in auto case packing of pillow bags...for you to decide!

**Name:**

- TCP 200-600

**Function:**

- Automatic case packing of pillow bags at up to **200 bags per minute!**

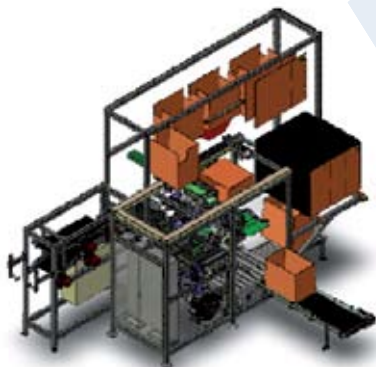

**Unique features:**

- Synchronised merging of bags from **dual/twin** bag makers, when required
- More product per m3 with Nor-Reg's case filling methodology
- **Flexibility** in packing pattern
- Quick, easy, reliable change-over. **NO PARTS – NO TOOLS**
- **Efficiency** through simplicity

Are you looking for an **integrated** system?

**These are your options:**

- Nor-Reg case erector (attached or above TCP 200-600 – remote if required)
- Modular RSC top-flaps folding and taping unit (finished case out of TCP)
- Integrated full case check-weighing system with reject mechanism

**NOR-REG Systems... setting the standards.**

## Integration of NOR-REG technology with robotics

The industry trend goes towards the integration of robotics with machine technology. The flexibility of the robot (thanks to its versatility in product-picking tools) allows it to handle several jobs at the same time. Tasks like product handling, blank handling and palletizing can be performed by the same machine.

### Integration of NOR-REG technology with robotics

=

- **Versatility**
- **Unlimited possibilities** (Well...almost!)

*We look forward to working with you on your future robotic needs!*

*NOR-REG Systems AS are seeing great possibilities and benefits in integration of robotics with NOR-REG technology.*

- your partner in end-of-line packaging

## NOR-REG Systems AS in Finland

NOR-REG Systems AS and TrexTech Oy have entered into a partnership agreement covering sales, marketing and after-sales service in Finland.

- We have not had representation in the Finish market for a long while and have recently looked for a suitable partner. TrexTech Oy share our vision and values. While the company is still young, the people at TrexTech Oy have a vast knowledge and long term experience in the packaging industry. This is a strong foundation for a successful and long-lasting co-operation, says Jo Knudsen, managing director in NOR-REG Systems AS.

- As we were looking for machine suppliers to represent, NOR-REG came up as the best possible partner. Their technical expertise, covering packaging equipment and raw materials; the reputation of their equipment in this country (20 years old machines are still working in Finland) are the ideal platforms for a successful partnership from which our customers will benefit, says Jarkko Niittynen, managing director in TrexTech Oy.

NOR-REG Systems AS and TrexTech Oy have entered into a partnership agreement covering sales, marketing and after-sales service in Finland. Jo Knudsen, Nils Fransrud, Jarkko Niittynen, Kari Hakkarainen and Jyrki Thil.

## Appointment of a new Technical Director

Thomas Halvorsen (32), a Graduate Engineer in Machine Design, has joined us as Technical Director in August this year. Thomas is responsible for the Project Management/Production/Electrical-Programming and Logistics departments at NOR-REG. We are very pleased to have him in our team and to draw on his impressive background and experience to enhance our service to you.

With more than 3500 projects delivered worldwide since 1969, our technical expertise, creative thinking and commitment to quality have made us a world leader in the supply of equipment and systems in the specialised area of end-of-line packaging automation.

NOR-REG Systems AS delivers

- innovative
  - integrated
  - value-adding
- solutions to YOUR requirements

*We wish you all a  
Merry Christmas and a  
Happy New Year!*

- your partner in end-of-line packaging
